

Paddy Museum

The unique architecture of the Paddy Museum represents bushels of harvested rice stalks. Rice motifs are repeated throughout the building, on staircase banisters, the museum gates and the fence surrounding it. The museum showcases the paddy cultivation process in Malaysia and displays all kinds of tools and equipment which have been used in the trade over the years. Through beautiful murals, the art work of 60 artists from North Korea, the history of paddy cultivation in Malaysia is revealed.

It honours the history, culture and significance of paddy farming in Kedah and is dedicated to the hardworking and simple paddy farmers, whose blood, sweat and toil have contributed to the objective of achieving self sufficiency in the rice industry.

Key Tips

The Paddy Museum is an important tourist attraction in Kedah as the state is known as the Rice Bowl state of Malaysia due to its important economic contribution to the country.
